Entrepreneurial-minded youth – growth potential for border region

“EnterYouth” ER85

SUMMARY OF THE PROJECT

The Project will have in focus the increase of the level of entrepreneurship on both sides of the border through the educational system improvement and modernization.

The project within the course of 24 months will create new educational infrastructure on both sides of border in form of hobby-school (centres) providing the IT/science/environmental studying with implementation of enterprising thinking elements (tools).

Collection and adaptation of the present experience (competence) in teaching/studying issues in accordance with planned centres needs.

Conditions’ determination for planned centres long-term cooperation (joint activities).

New educational product will be developed and tested.
