36 months
18.04.2019 – 17.04.2022

T06

Environmental protection, climate change mitigation and adaptation

Improving biodiversity and increasing awareness of environmental protection in regional centres in Estonian-Russian border area

BioAware ER65

Summary of the Project

BioAware project will raise people's awareness of the importance of environmental protection and energy-efficient practices through different campaigns, environmental days, games, researches, youth and teachers' exchanges, art project.

Reconstruction of 3,9 ha park area around river Mirozhka in Pskov (Russia) including small scale purification water asset and 4,2 ha of creek Koreli shore in Võru (Estonia) will be implemented to make recreation areas and outdoor study of environment more attractive. To make education process for children more effective Project will develop educational materials on environment and purchase necessary equipment.

As an outcome created attractive, biologically diverse and environmentally sustainable urban areas in Võru (Estonia) and Pskov (Russia) will support learning processes.
